**COMPASS**<sup>TM</sup>  
— WIRE CLOTH CORP.  
THE SCREENING PROFESSIONALS

*Your source for...*

## AGGREGATE SCREENS, RELATED WEAR PARTS ... and EXPERIENCE

We're the whole package: a comprehensive line of aggregate screens and wear parts, and over 100 years of application experience. Need on-site support? We're there!

High carbon and stainless steel openings are available for immediate shipment from our extensive inventory. Our current stock list is posted on the web ([compasswire.com](http://compasswire.com)), but if you don't see your specs, give us a call. Special sizes, styles and materials are always available.

Shroud materials include stainless, galvanized and mild steel, and other materials are available on request.

**TROMMEL SCREENS** are completely fabricated in our facility.

**URETHANE AND RUBBER SCREENS** offer a great throughput and durability.

**CLAMP RAILS AND OTHER WEAR PARTS** are readily available.

Our Trommel screens are formed with shrouded edges with wire diameters ranging from .135 to .250. All others are formed with metal bands, wire wrapped and welded.

Our non-blinding screens are high quality screening surfaces that help to minimize pegging and blinding while still separating flakes and splinters. These screens provide accurate screening and sizing where other products fail, due to high percentages of open area when compared to square openings, resulting in higher throughput. The wires in these screens vibrate independently, which keeps the screens clean.

All non-blinding screens are available in oil-tempered and stainless steel wire, and can be hooked with any edge style to fit all screening equipment.
